

IRON CLAD

Space Arm

BALANCE OF PERFORMANCE

JS1 Space Arm

Heavy-Duty Load Support for Vehicles, The JS1 Space Arm is an advanced, heavy-duty mounting system engineered to provide superior support and stability for automotive applications. Designed specifically for **Iron Clad**, this robust structure is capable of handling extreme loads with precision and reliability.

The **High Load Capacity** specifically designed for **Iron Clad** can supports up to **3000 Kg**, making it ideal for heavy-duty use in automotive and industrial environments. With its cutting-edge engineering and **Iron Clad's** trusted durability, the **JS1 Space Arm** is a top-tier solution for vehicles requiring unmatched strength and support.

The **Red & White Kits** are not built to support up to 3000kg and may fail under heavy loads. Using them for high weight applications can compromise safety and durability.
